

Questions asked of primary caregivers of children ages 8-13 months old. Asked to answer based on their knowledge of children in general, not about the specific child in the study. Parents were allowed to give a “don’t know” or “unsure” answer.

**Agree or Disagree:**

(1) All infants need the same amount of sleep.

NO

(2) A young brother or sister may start wetting the bed or thumbsucking when a new baby arrives in the family.

YES

(3) A child thinks he is speaking correctly even when he says words and sentences in an unusual or different way, like “I goed to town” or “What the dollie have?”

YES

(4) Children learn all of their language by copying what they have heard adults say.

NO

**2-Part Questions (Agree/Disagree then Older/Younger):**

(5) A one-year-old knows right from wrong. *Would a child be older or younger than one year when she knows right from wrong?*

NO (older)

(6) A baby will begin to respond to her name at 10 months. *Would a child be younger or older than 10 months when she first responds to her name?*

NO (younger)

(7) Most infants are ready to be toilet trained by one year of age. *Would most infants be younger or older than one year when they are ready to be toilet trained?*

NO (older)

(8) A baby of 12 months can remember toys he has watched being hidden. *Would a baby be younger or older than 12 months when he first remembers toys he has watched being hidden?*

YES

(9) One-year-olds often cooperate and share when they play together. *Would children be younger or older than one year when they often cooperate and share when they play together?*

NO (older)

(10) A baby is about 7 months old before she can reach for and grab things. *Would a baby be younger or older than 7 months before she can reach for and grab things?*

No (younger)

(11) A baby usually says his first real word by six months of age. *Would a baby be younger or older than six months when he says his first real word?*

No (older)

Score of 0-11, where 1=correct, 0=incorrect or unsure.
